

BrainPop – Forms of Energy (PRACTICE ACTIVITY)

Write the following questions down on a separate piece of paper and answer them as you watch the video:

1. What is energy?
2. Come up with examples for each of the following types of videos:
 - a. Potential Energy
 - b. Chemical Energy
 - c. Electrical Energy
 - d. Light Energy
 - e. Mechanical Energy
 - f. Thermal Energy
3. **Think.** Some objects can have two or more forms of energy at the same time. Come up with two examples of this.

Once you finish the video take the quiz. How did you do?
